reChanneld: marketing action plan, first 90 days

Prepared by Kira (Knock) for Mikko and Touko · October 2026 · Draft for discussion. Numbers marked *assumption* are replaced with real data in week 1.

1. Starting point

- No marketing owner, budget, plan, tracking or recurring activity. No social media and no paid campaigns.
- The website rebrand is with the founder and has no date. The only sales material is one deck and a few case slides.
- Pipeline comes from Touko's and the founders' networks. Nothing is measured, so we don't know the conversion rate at any stage.
- What works in our favour: 7 customer cases with hard numbers and named people (Lippu.fi, S-Bank, CDON, Laurea, Nets/Nexi, Keusote, plus one AI-agent case), 20+ recognisable Finnish logos, and fast implementation (8 business days at Lippu.fi, 2 weeks at Nets).

2. Goal for the 90 days

Build a repeatable way to create first meetings with the right buyers, measured weekly. Brand work only where it helps that.

METRIC (BY DAY 90)	TARGET	HOW IT IS REACHED
Target accounts in CRM with 2–3 named contacts each	80	60 Finland, 20 UK (section 3)
First meetings held	12–15	Outbound ≈ 10, referrals and LinkedIn ≈ 3–5
Qualified opportunities (budget owner, a problem we solve, a timeline)	6–8	About 50% of first meetings, *assumption*
Pipeline value	opps × ACV	ACV and sales cycle to be confirmed with Mikko in week 1
Weekly funnel report	from week 3	HubSpot (free) + a one-page dashboard

Funnel maths behind the meeting target

STEP	VOLUME	RATE USED
Contacts in outbound sequences (80 accounts × 2.5)	200	
Positive replies	14–20	7–10% positive reply rate for personalised account-based outreach, *assumption*
Meetings booked from positive replies	9–12	about 60%
Plus customer referrals, founder posts and website demo requests	3–5	a conservative estimate
First meetings	**12–17**	**Real rates replace these after wave 1 (week 6)**

3. Who we go after (ICP)

reChanneld pays off where there is high contact volume and existing self-service or an AI agent that customers ignore. The deck's references confirm this: banks, ticketing, e-commerce, payments, universities and the public sector.

SEGMENT	ACCOUNTS	WHY NOW	REFERENCE TO LEAD WITH
Wellbeing services counties and large cities (FI)	15	Heavy phone load, budget pressure, digital service targets. 21 counties plus Helsinki	Keusote: NPS from negative to +70, −7% calls
Banks and insurers (FI)	15	Mobile and AI-agent investments that customers don't use	S-Bank: +83% to self-service
E-commerce, ticketing, consumer subscriptions (FI)	15	Seasonal peaks (Q4, sales events) overload customer service	CDON: CSAT 50% → 84%; Lippu.fi: −45% calls
Energy, telecom, utilities (FI)	10	Price and contract changes drive call spikes	Nets/Nexi: 78% to automation
Universities and IT service desks (FI)	5	Email-heavy service desks	Laurea: email share 80% → 49%
UK news and subscription media	20	Touko's existing UK push. Packs already built for DC Thomson, Reach, the Mirror, the Express and the MEN	CDON + AI-agent case

Buyers and what each one cares about

PERSONA	THEIR PROBLEM	MESSAGE	PROOF
Head of Customer Service / Contact Centre	Queues, cost per contact, staff load	Fewer contacts that need a person, without lower CSAT	CDON −50% human contacts, CSAT up
Head of Digital / CX / Self-service owner	Built self-service or an AI agent, and customers still call	Your AI agent is only as good as the traffic you send it	AI-agent case: +44%, −62% when removed, +107% when back
COO / CFO (public sector: service director)	Cost, measurable results	Live in days, results visible in weeks	Lippu.fi 8 days; €1.64 net value per session

Positioning, one line (founders to finalise)

> reChanneld sits on your customer service pages and guides each customer to the right channel (self-service, AI agent or a person) before they contact you.

The AI-agent angle leads in 2026 because it attaches reChanneld to budgets companies already spent. Cost reduction is the second message, and CX the third.

4. Channels, ranked

Scored for a team with no marketing staff: impact on meetings in 90 days, confidence, and effort. Only the top four get real time.

#	CHANNEL	WHAT WE DO	IMPACT	CONF.	EASE	DECISION
1	**Account-based outbound**	Tier A (20 accounts): a concept pack on the prospect's own site + a 4-touch sequence. Tier B (60): a personalised 4-touch sequence	9	7	6	**Main engine**
2	**Customer referrals and co-marketing**	Ask the 7 case customers for public use, one intro each and one joint webinar	8	6	7	**Do**
3	**Founder and Touko LinkedIn**	2 posts a week, written by me, posted by them. Targeted connection requests to the 200 contacts	6	7	8	**Do**
4	**Website conversion basics**	Demo CTA and form to CRM, 2 case pages, UTM tracking. reChanneld running on our own site	6	8	6	**Do**, independent of the rebrand
5	Partner co-selling	AI-agent and contact-centre vendors whose customers need traffic to their agent	8	4	4	Start talks in month 2
6	LinkedIn ads (retargeting)	Matched audience of the 80 accounts only	4	5	7	Test in month 3, €1,000
7	Events	Attend 1–2 CX or contact-centre events as visitors, with meetings pre-booked	5	5	5	Only with pre-booked meetings
8	SEO / blog	Long-term. Wait for the new website	3	5	4	Not now

5. Experiments (one variable each, judged in week 6 and week 10)

#	HYPOTHESIS	METRIC	KEEP IF
E1	The AI-agent hook gets more replies than the cost-saving hook	Positive reply rate per sequence	≥ 1.5× the other
E2	A concept pack on the prospect's own site books more meetings than a plain personalised email	Meetings per account, tier A vs tier B	≥ 2× tier B (justifies the extra work)
E3	Wellbeing counties reply better than banks	Positive reply rate by segment	Move volume to the better segment
E4	Posts from founders reach buyers better than posts from the company page	Profile views and accepted connections from ICP titles	Stop company-page posting if lower
E5	reChanneld on our own site lifts demo requests	Demo requests per 100 visits, 4 weeks before vs after	Any lift, plus it becomes a live demo
E6	A customer-hosted webinar books meetings with tier B accounts	Sign-ups from target accounts, meetings within 14 days	≥ 3 meetings

6. Week-by-week plan

Owner: K Kira · T Touko · M Mikko. Founder time is kept to about 1–2 hours a week.

WEEKS	ACTIONS	OWNER	DONE WHEN
1	Kick-off: confirm ACV, sales cycle, win rate, current open deals, ICP and the segments above. Agree reporting.	K M T	2-hour session held, numbers in the plan
1	Set up HubSpot (free): pipeline stages, import current deals and contacts. UTM rules. Demo form posts to CRM.	K T	Every deal and lead in one place
1–2	Ask the 7 case customers: public-use permission, logo, quote, one intro, webinar interest.	T (I draft the emails)	Written yes or no from each
2	One-page messaging doc: positioning line, 3 personas, proof per persona, objections.	K , M approves	Approved
2	LinkedIn profiles for Mikko and Touko rewritten for buyers. Company page updated.	K	Live
3–4	Build the account list: 80 accounts, 200 contacts (Sales Navigator), tiers A and B. Write sequences in FI and EN for the 3 personas.	K	List and sequences in the tool
3–4	Two case pages on the current site (Lippu.fi, CDON) + PDF versions. Install reChanneld on our own site.	K content, M publishing	Live with tracking
3	Start LinkedIn: 2 posts a week (Mon founder, Thu Touko).	K writes, M T post	Running every week
4	**Outbound wave 1**: 30 accounts (10 tier A with concept packs).	K builds, T sends	Sequences live
5–6	Wave 2: 30 accounts. 60-second explainer video for sequences and the website.	K T	Video live, used in touch 3
6	**Review 1**: reply rates by hook, segment and tier. Cut the weakest segment and message.	K M T	Decisions written down
7–8	Customer webinar (e.g. CDON or Keusote, 30 min) promoted to all 80 accounts. Partner outreach to 5 AI-agent / contact-centre vendors.	K organises, T hosts	Webinar held, recording cut into clips
8–10	Wave 3: remaining 20 accounts + UK media (packs for DC Thomson and the Reach brands already exist).	K T	All 80 accounts touched
9–12	LinkedIn retargeting test (€1,000) on the 80 accounts. Follow-up content for warm accounts.	K	Test results reported
12	**Review 2**: results against targets, cost per meeting, plan and budget for Q1.	K M T	Q1 plan agreed

7. Weekly dashboard

A single page, updated every Monday from HubSpot and LinkedIn, and sent to Mikko and Touko.

STAGE	METRIC	WHY WE TRACK IT
Reach	Accounts touched; contacts in sequence; LinkedIn connections accepted (ICP titles)	Are we doing enough activity?
Response	Positive reply rate by segment, hook and tier	Is the message right? (Inputs for E1–E3)
Meetings	Meetings booked and held; source (outbound / referral / LinkedIn / web)	The main 90-day output
Pipeline	Qualified opportunities; € pipeline; stage moves	Does marketing create revenue?
Website	Visits from target accounts; demo requests; conversion rate	Is the site helping or leaking?

8. Budget for 90 days (excluding my fee)

ITEM	PER MONTH	90 DAYS	NOTE
HubSpot CRM	€0	€0	Free tier is enough to start
LinkedIn Sales Navigator (1 seat)	≈ €90	≈ €270	Account and contact lists
Email sequencing tool	≈ €60–100	≈ €250	Sends from Touko's mailbox, with tracking
LinkedIn retargeting test		€1,000	Month 3 only, 80-account audience
Video, design, copy	€0	€0	Produced by me
Total		**≈ €1,500**	**No other media spend in the first 90 days**

Tool prices are approximate list prices. Check them at sign-up.

9. What I need from you

- **Numbers:** average deal size, sales cycle, win rate, and current open deals. Without them the targets stay at the meeting level.
- **Access:** product demo or screenshots, current website CMS, a sending mailbox (Touko), a LinkedIn posting routine.
- **Customers:** Touko asks the 7 case customers in week 1. I draft the emails.
- **Time:** 2-hour kick-off, then 30 minutes every two weeks, plus about 15 minutes a week each from Mikko and Touko to approve posts.
- **Website:** a date for the rebrand, or agreement that we update the current site in the meantime.

10. My role

I own the plan and do the work: research, lists, copy, sequences, concept packs, case pages, posts, video, CRM setup and reporting. Touko sends outreach and runs meetings, and Mikko approves messaging. Two days a week for 90 days at **€4,500 a month** (excl. VAT), reviewed at day 90 against the targets in section 2, with the option to continue, change scope or turn it into an employed role.

Appendix A. Outbound sequence, persona "Head of Digital / Self-service"

Sent from Touko's mailbox. A Finnish version is written for Finnish accounts. Tier A accounts get the concept pack in touch 3. Placeholders in [brackets].

TOUCH 1 · EMAIL · DAY 1

Subject: [Org]'s AI agent and the phone queue

Hi [Name],

Many service teams launched an AI agent in the last year and still see the same call volumes. Customers don't find it, so they call.

One of our customers measured this. When reChanneld guided visitors to their AI agent, agent conversations went up 44%. When the guide was removed for two months, they dropped 62%. When it came back, they rose 107%.

Would it help to see what this would look like on [org's customer service page]? I can send a short mock-up.

Touko

TOUCH 2 · LINKEDIN CONNECTION · DAY 3

Hi [Name], I sent you a note about [Org]'s AI agent and call volumes. Happy to connect either way. Touko

TOUCH 3 · EMAIL · DAY 7 (TIER A: WITH CONCEPT PACK)

Subject: Re: [Org]'s AI agent and the phone queue

Hi [Name], I made the mock-up anyway: [org site] as it is today, with reChanneld on top (attached, 2 pages).

For a similar setup, [reference matched to segment, e.g. CDON: contacts needing a person dropped 50% and CSAT rose from 50% to 84%].

Worth 20 minutes?

TOUCH 4 · EMAIL · DAY 14

Subject: Close the loop?

Hi [Name], I'll stop here so I don't fill your inbox. If guiding customers to self-service or your AI agent becomes a priority, the [Org] mock-up is ready. Who else at [Org] would own this?

Appendix B. Customer request (Touko to the 7 case customers, week 1)

Subject: A small favour: your reChanneld results

Hi [Name], your results with reChanneld ([result]) are the best proof we have. Could we 1) use them with your name and logo on our website and LinkedIn (you approve the text first), and 2) would you be open to a 30-minute webinar or a short intro to one peer who'd benefit? Either is a big help. Touko
