

PREPARED FOR GROWEO · SALES

Selling **AI Reach** to customers you already have.

A ready-to-use upsell pack for one live Groweo customer, Muurametalot. It covers what their site is missing, what AI Reach would add, and the message your account manager can send this week.

SUMMARY

AI Reach launches this month. Your best leads are already customers.

Groweo has more than 1,700 customers, and many of them run WordPress sites with Groweo tools already in place. Each of them is a natural AI Reach customer. What your team needs is a quick way to show each one, in concrete terms, what AI Reach would do for *their* site.

This pack shows how that looks for one account: **Muurametalot**, a modular house builder already running the Groweo quiz, chat and quote form, and already a case study on groweo.com.

The finding is simple. Since September 2026 every Muurametalot model is a "NopsaKoti", a name nobody searches for yet. Buyers search for things like "*paljonko maksaa muuttovalmis omakotitalo*", and the site has no page that answers that directly. Its newest content is company news. Groweo already captures the lead once a buyer arrives. AI Reach is what brings more buyers in.

What's inside

- **Muurametalot today:** the facts, and the Groweo tools already on the site
- **Content audit:** what exists, what's missing, and a 12-question topic map
- **Concept page**, as a separate long PDF: the real site with the AI Reach layer, plus one guide drafted with their real prices
- **Value model** (illustrative) and a 90-day plan
- **The message** your account manager can send, in Finnish

I make packs like this at Knock. I research each account, build the concept on the customer's real site and write the message. The process is semi-automated: I set the strategy and check everything by hand. I've worked in this market before, at Leadoo and Videobot, so I know how these conversations go.

If this is useful, I'd like to show you how it would work across a batch of your accounts in 20 minutes.

Kira

Knock • knock.fi

Muurametalot today

A Finnish builder of move-in-ready modular homes, made in its own factories in Tornio and Kangasniemi. The company is ProModules Oy and has been building since 2003.

423

house packages delivered
(site counter)

11

NopsaKoti models, 64–135
m²

€178k–287k

move-in-ready prices,
including ground-source
heat

< 2 mo

by Muurametalot

Groweo is already doing its part

The "Testaa sinulle sopivin talo" quiz on muurametalot.fi/valmistalot, marked "Powered by groweo". Screenshot from 7 Oct 2026.

GROWEO TOOL ON THE SITE	WHERE	ROLE
House quiz	Home page and models page	Turns a visitor into a lead with model suggestions sent by email
Chat	Every page, bottom right	Answers questions on the spot
Quote form	/yhteys/tarjouspyynto	Sends a quote request to the area rep. The form links to Groweo's terms of use
Search & AI content	None	Nothing brings new buyers to these tools. This is the gap AI Reach fills

Why this account first: live Groweo customer, case study on groweo.com, brand-new product name, high-value sale.

A single extra house sale is worth about €180,000–290,000 to them. AI Reach doesn't need to deliver much to be clearly worth it.

Strong product pages. Very little that answers buyers' questions.

We reviewed the home page, the models page, the move-in-ready page and the quote form. The site sells well to someone who has already decided. It does little for someone who is still searching.

Home page: the newest content is the NopsaKoti switch, a Ruka project and a customer-satisfaction post.

Footer: 2 latest articles, both company news, and 1 customer story.

What's there

- Clear model cards with prices and sizes (11 models)
- A good explainer page: "Muuttovalmis talopaketti"
- A few older guide-style posts: ASP loans, "Mitä muita kuluja...", interior design
- An FAQ page linked in the top bar
- The Groweo quiz, chat and quote form

What's missing

- Pages built around the questions buyers type into Google or ChatGPT
- An explanation of "NopsaKoti" in the words buyers use: modular, prefab, move-in-ready
- A regular flow of content. The latest posts are news
- Links from content to the quiz (the quiz is only on the home and models pages)

Scorecard (our view, from 4 pages)

Product information	●	●	●	●	●
Lead capture (Groweo)	●	●	●	●	●
Price transparency	●	●	●	●	●
Answers to buyer questions	●	●	●	●	●
Fresh content	●	●	●	●	●
Ready for AI answers (GEO)	●	●	●	●	●

This is a qualitative view, not a measured SEO score. The AI Reach analysis would replace it with real data.

THE FINDING

"NopsaKoti" is a new name. Buyers search with their own words.

Since September 2026 the whole range is sold as NopsaKodit. That's a good brand name, but nobody types it into a search box yet. This is the starting topic list we'd give AI Reach.

#	BUYER QUESTION (FINNISH)	WHAT IT MEANS	ON THE SITE TODAY
1	Paljonko muuttovalmis omakotitalo maksaa 2026?	Total cost	Partly prices on model cards
2	Mitä muita kuluja talopakettin päälle tulee?	Hidden costs	Covered existing article
3	Moduulitalo vai elementtitalo – mitä eroa?	What NopsaKoti is	Missing
4	Kauanko omakotitalon rakentaminen kestää?	Timeline	Partly one section on a page
5	Talopaketti ASP-lainalla	First-home financing	Covered existing article
6	Pieni omakotitalo alle 100 m ²	Small homes	Missing (4 models fit)
7	Maalämpö uuteen omakotitaloon – hinta ja hyödyt	Heating	Partly USP box only
8	Mitä sorapatja tarkoittaa? Tontin valmistelu	Plot preparation	Missing
9	Ensiasunto omakotitalona alle 200 000 €?	First-time buyers	Missing (4 models under €200k)
10	Kosteudenhallinta: miksi tehdasrakentaminen?	Quality worries	Partly USP box only
11	Tuuletettu alapohja vai maanvarainen laatta?	Technical choice	Partly USP box only
12	Muuttovalmis talo [maakunta]: toimitus ja edustaja	Local searches	Missing (form lists areas)

Coverage is judged from the four pages reviewed on 7 Oct 2026, plus the article titles they link to. No search volumes are shown because we haven't measured them. AI Reach's keyword research would rank these topics.

Start with #1, #3, #4 and #6. They're the questions closest to a quote request.

Each guide ends in the Groweo quiz ("Testaa sopivin talo") and the quote form, so every reader can become a lead.

What the concept page shows

The concept page is a separate long PDF. It shows muurametalot.fi exactly as it is today, with the AI Reach layer added in purple dashed lines. Each yellow number on it matches a note below.

1

Groweo is already live

The quiz, chat and quote form all run on Groweo, so lead capture is already in place.

2

The newest content is company news

Good for people who know the brand, but not what a first-time buyer searches for.

3

Thin content flow

2 latest articles and 1 customer story. "NopsaKoti" is not yet a search term.

4

AI Reach finds the gaps

Topics buyers search for, compared with what the site covers.

ILLUSTRATIVE UI

5

New "Oppaat" section

Four guides in Muurametalot's own style and photos, published only after approval.

6

Every guide leads to the Groweo quiz

Content brings the visitor in and Groweo turns them into a lead, all on one licence.

7

A real draft

"Mitä muuttovalmis omakotitalo maksaa 2026?" uses only facts from their site (prices, inclusions), with an AI disclosure line.

8

Found in AI answers

Clear pages with real numbers are the kind AI tools quote. This can't be guaranteed, but it becomes much more likely.

9

Measured in Groweo Performance

Which guides lead to quiz starts and quote requests, so AI Reach writes more of what works.

EXAMPLE NUMBERS

Concept page, top part (scaled down). Open the PDF for full size.

One extra house a year pays for it many times over

These are deliberately cautious assumptions. Muurametalot knows its own conversion rates and can replace ours in a minute.

The maths

ASSUMPTIONS

Extra quote requests from guides, per month **3**

Share of quote requests that become a signed house **1 in 20**

Extra houses per year ($3 \times 12 \div 20$) **1.8**

Average move-in-ready price (mid-range) **€215,000**

Extra sales per year $\approx$ €387,000

The price range of €177,975–287,175 is from muurametalot.fi. Quote volume and conversion rate are assumptions, not data. AI Reach costs: a €149 setup fee plus the licence plan (see Groweo's pricing).

Break-even is far below one house.

Even if the real numbers are a tenth of ours, the guides keep working and the content builds up over time.

What the account manager can show

- Their own prices, already in a ready-made guide
- The Groweo quiz they already pay for, now getting more traffic
- Performance reports that tie each guide to quote requests
- No extra work for their team, only a review before publishing

First 90 days with AI Reach

WEEKS 1–2

Set up and analyse

- Check that the site runs on WordPress
- Run the AI Reach topic and SEO audit
- Agree on tone and the review process

WEEKS 3–6

First four guides

- Topics #1, #3, #4 and #6
- Link each guide to the quiz and quote form
- Add an "Oppaat" block to the home page

WEEKS 7–12

Measure and repeat

- Performance: readers → quiz → quote requests
- Write more of what works
- Start the regional pages (#12)

The account manager's message

Short and written from the customer's side. Attach the concept page. Written in Finnish because both Groweo and Muurametalot work in Finnish.

EMAIL FROM THE GROWEO ACCOUNT MANAGER TO MUURAMETALOT · FINNISH

Aihe: Oppaat, jotka tuovat lisää tarjouspyyntöjä

Hei [Nimi],

Talomallitesti ja chat toimivat teillä jo hienosti. Katsoin, mitä talon rakentajat kysyvät Googlelta ja AI-työkaluilta ennen tarjouspyyntöä: esimerkiksi *"paljonko maksaa muuttovalmis omakotitalo"* ja *"moduulitalo vai elementtitalo"*. Sivuillanne ei vielä ole näihin suoraan vastausta, ja NopsaKoti on uusi nimi, jota kukaan ei vielä hae.

Uusi Groweo AI Reach tekee juuri tämän: se löytää aiheet, kirjoittaa oppaat teidän tyylillänne ja ohjaa lukijat suoraan talomallitestiin. Tein liitteeseen valmiin esimerkin, jossa on yksi opas teidän omilla hinnoillanne.

Katsotaanko yhdessä 20 minuutissa? Ensi viikon tiistai tai torstai sopisi minulle.

[Nimi], Groweo

About Groweo AI Reach (from groweo.com, 7 Oct 2026)

- SEO and GEO content technology for **WordPress** sites, available from **October 2026**
- Finds topics from the site's existing content, competitors and customer questions, using keyword research and content-gap analysis
- Creates content in the brand's voice, either as drafts to review or published automatically with AI disclosures
- Tracks results in **Groweo Performance** and uses them to plan what comes next
- Audits technical SEO. The customer or partner makes the changes
- Available on all Groweo licence plans: **€149 setup** (excl. VAT), with the number of articles set by the plan

To confirm before sending

Is muurametalot.fi on WordPress? Is Finnish supported at launch? How many articles a month does their plan include? Can guides link to the quiz automatically? Who at Muurametalot owns marketing?

One pack is a sample. Twenty is a launch campaign.

Pick 10–20 Groweo customers with WordPress sites. For each one I'll research the account, find the content gap, build the concept on their real site and write the account manager's message. Your team just reviews and sends.

What you get per account

- Research and a content audit
- A topic map for AI Reach
- A concept page on the customer's real site
- One drafted guide using their real facts
- A message ready to send

Optional

- A 60-second AI Reach explainer video to use in place of, or alongside, the 30-minute walkthrough
- A personalised video version for your top accounts

Let's talk for 20 minutes
