reChanneld: content plan, first 90 days

Companion to the marketing action plan · Prepared by Kira (Knock) for Mikko and Touko · October 2026 · Draft. Every customer number comes from the current sales deck. Anything with a customer's name is published only after the customer approves the text.

1. What gets produced, and when

Content exists to feed the pipeline. Each piece below has a job in the action plan: it opens a conversation, answers an objection, or gives Touko something to send.

ASSET	QTY	USED IN	WEEKS	OWNER
Messaging doc (positioning, personas, proof, objections)	1	Everything below	1–2	K, M approves
Case studies (web page + 1-page PDF + LinkedIn version)	3, then 7	Outbound touch 3, website, posts, deck	2–6	K, T gets approvals
LinkedIn posts (Mikko, Touko, company page)	24	Warming target accounts, inbound	3–12	K writes, M T post
Website: interim fixes now, full structure and copy for the rebrand	1 site	Every touch links here	3–4 interim, 5–8 rebrand copy	K copy, M build
Sales deck rebuilt around buyer problems	1	First meetings	4–5	K
Segment one-pagers	6	Outbound attachments, follow-ups	5–8	K
ROI calculator (sheet, then web)	1	Second meetings, business case	5–6	K, M checks the maths
Security, GDPR and implementation pack	1	Procurement (public sector, banks)	6–7	M facts, K writes
Explainer video, 60 s + 3 × 15 s clips	1 + 3	Website hero, sequences, posts	5–6	K
Customer webinar + recording clips	1	Tier B accounts, posts	7–8	K organises, T hosts
Account concept packs (prospect's own site)	20	Tier A outbound	4–12	K

2. Rules for all content

- Lead with the customer's problem and a number. Product features go last.
- One proof point per piece, with the customer named and the source stated.
- Write in the founders' own words. I draft, they edit, and nothing goes out in a voice they wouldn't use.
- Finnish for Finnish public sector and SMEs, English for UK and international accounts and for most LinkedIn posts.
- Every piece ends in one action: book a demo, see the case or reply.

3. Case studies

reChanneld has seven cases with numbers, all inside the sales deck and none public. Order of production: the three that match the main outbound segments first.

#	CUSTOMER	HEADLINE NUMBER	SEGMENT IT SELLS TO	STATUS
1	Lippu.fi	−45% phone calls, live in 8 business days	E-commerce, ticketing	Numbers + quote in deck. Needs approval
2	CDON	CSAT 50% → 84%; −50% contacts needing a person	E-commerce, marketplaces	Numbers in deck, no quote. Needs a quote
3	AI-agent case (name to confirm)	+107% AI-agent volume with reChanneld	Banks, insurers, anyone with an AI agent	Is it publishable by name? Ask
4	Keusote	NPS from negative to +70; −7% calls	Wellbeing services counties, cities	Numbers + quote in deck
5	S-Bank	+83% contacts to self-service	Banks	Numbers + quote in deck
6	Nets / Nexi	78% to automation; 2-week implementation	Payments, fintech	Numbers + quote in deck
7	Laurea	Email share of tickets 80% → 49%	Universities, IT service desks	Numbers + quote in deck

Template (same for every case, about 350 words on the web)

BLOCK	CONTENT
Headline	Customer + result + time. "CDON lifted CSAT from 50% to 84% by halving contacts that need a person"
Facts box	Industry, size, channels in use, implementation time
Before	What customers did and what it cost (2–3 sentences, from an interview with the customer)
What changed	Where reChanneld was placed, which topics went to which channel, and anything they had to change
Results	3–4 numbers, each with the time period
Quote	Named person and title
Next step	"See how this would work on your site" → demo

Each case is cut into: a web page, a 1-page PDF, a LinkedIn post, a 15-second clip and one slide for the deck.

Draft: Lippu.fi (web version)

Lippu.fi cut customer service calls by 45% in eight business days

Lippu.fi, part of CTS Eventim and Finland's market leader in ticketing, runs one of the country's most visited e-commerce sites. [Before: from an interview with Teresa Alander, e.g. which questions drove phone calls and at what times.]

Lippu.fi added reChanneld to its customer service pages. Visitors choose what they need help with, and each topic is routed to the channel Lippu.fi prefers for it: self-service, automation or a person. The team defined its channel strategy and went live in eight business days.

Results: customer service phone calls fell 45%. 80% of contacts were guided to the preferred self-service channel, and lead generation grew 22%.

"Within just a few days we were able to nail our service channel strategy with reChanneld. Nudges work excellently, and we offer a more intuitive experience to our customers than before." Teresa Alander, Head of Operations, Lippu.fi

The quote is lightly edited from the deck for grammar. Lippu.fi approves the final wording. The text in [brackets] comes from a 20-minute interview.

4. LinkedIn

People follow people, so the founders and Touko post, and the company page reshares. Two posts a week from week 3: Monday from Mikko, Thursday from Touko. Text posts with one image or a document carousel. No hashtag lists, no engagement bait.

CONTENT PILLAR	SHARE	WHAT IT IS	EXAMPLE
Customer results	40%	One case, one number, what changed	CDON CSAT 50% → 84%
How-to for service leaders	30%	Practical advice on channel strategy, nothing to do with buying	"Map your top 10 contact reasons in an hour"
AI agents in customer service	20%	The 2026 conversation, with our data	+44% / −62% / +107% test
Behind the company	10%	Why we built it, the team, new customers	Founder story

12-week calendar

WK	MONDAY · MIKKO	THURSDAY · TOUKO
3	The AI-agent test: +44%, −62%, +107%	Map your top 10 contact reasons in an hour
4	Why we started reChanneld	CDON: CSAT 50% → 84%
5	Your phone number is the first thing on your help page. Why?	Lippu.fi: live in 8 business days
6	Explainer video launch (60 s)	Three channel mistakes we see in every audit
7	Keusote: from negative NPS to +70	Webinar invite (customer guest)
8	What "self-service adoption" actually measures	Webinar clip 1
9	S-Bank: +83% to self-service	Webinar clip 2
10	Peak season: guiding Black Friday questions	Laurea: email tickets 80% → 49%
11	Public sector: phone queues and digital targets	Nets: 2-week implementation
12	What we learned from 4.3M sessions a year	Q4 summary and what's next

Post 1 · Mikko · week 3

One of our customers tested what their AI agent does without us.

They had reChanneld on their busiest pages, asking visitors what they need and sending each topic to the right place, including the AI agent.

With reChanneld, AI-agent conversations went up 44%.
They removed it for two months: −62%.
They put it back: +107%.

The agent was the same the whole time. What changed was whether people found it.

If your AI agent is quiet, look at what happens before people reach it.

Post 2 · Touko · week 3

A one-hour exercise for any customer service lead:

1. Export last month's contacts and list the 10 most common reasons.
2. For each, write the channel that answers it best: self-service, chat, AI agent or phone.
3. Open your help page and pretend to be that customer. Where does the page send you?

In most audits we do, the phone number is the most visible option for all 10.

That gap is your channel strategy.

5. Website

The rebrand has no date, so the work is split. **Interim (weeks 3–4)** fixes the current site so outbound links land somewhere useful. **Rebrand (weeks 5–8)** delivers the full structure and copy so the founder's design work has finished content to use.

Interim fixes on the current site

- "Book a 20-min demo" button in the header and at the end of every page. The form sends to HubSpot (name, work email, company, one optional question).
- Two case pages (Lippu.fi, CDON) and a customer logo bar on the home page.
- reChanneld running on our own site to route visitors: demo, customer support, partnership, jobs. It works as a live demo.
- GA4 or a privacy-friendly alternative, with UTM rules for outbound and LinkedIn links.

Site structure for the rebrand

PAGE	JOB	KEY CONTENT
Home	Explain in 5 seconds, prove in 30	See wireframe below
How it works	Remove "is this a big project?" doubt	Widget, channel rules, analytics; 3-step setup; days, not months
For AI agents	Own the 2026 conversation	The +44 / −62 / +107% test; how routing feeds an agent
Solutions (6 pages)	One page per segment, linked from outbound	Public sector, banking and insurance, e-commerce and ticketing, utilities and telco, education and IT service desks, media and subscriptions. Each with its own case
Customers	Proof	All cases, filterable by industry
Security and implementation	Pass procurement	GDPR, data location, accessibility, integrations, timeline
ROI calculator, About, Book a demo	Business case, trust, conversion	Interactive calculator; team; demo form

Home page, top to bottom (draft copy)

SECTION	COPY / CONTENT
Hero	**Guide every customer to the right channel before they contact you.** reChanneld sits on your customer service pages, asks what people need and routes them to self-service, your AI agent or the right person. Live in days. [Book a 20-min demo] [See how it works]
Logo bar	Posti, S-Pankki, Nets, DNA, Lippu.fi, Laurea… "4.3M customer sessions a year"
Problem	You built self-service and an AI agent. Customers still call, because your help page shows them a phone number first.
How it works	1. Customer says what they need. 2. reChanneld routes each topic by your rules. 3. You see why people contact you, in real time.
Results	−45% calls (Lippu.fi) · CSAT 50% → 84% (CDON) · +107% AI-agent use · 87% find it easy
AI agents + cases	Short version of the AI-agent page, then 3 case cards
Implementation + CTA	"Lippu.fi: 8 business days. Nets: 2 weeks." Then: see it on your own site, and we'll mock up reChanneld on your help page before the demo.

6. Sales materials

Today there's one deck and a few case slides. The kit below covers each stage of a deal, in the order Touko needs it.

STAGE	MATERIAL	WHAT'S IN IT	WK
First touch	Outbound sequences (FI/EN, 3 personas)	See the action plan, appendix A	3–4
First touch, tier A	Account concept pack	The prospect's real help page with reChanneld on top, 2–3 findings	4+
First meeting	**New sales deck** (12 slides)	See the outline below	4–5
After the meeting	**Segment one-pagers** (6)	Problem, how it works, case, results, next step: one per segment	5–8
Business case	**ROI calculator**	See below	5–6
Procurement	**Security, GDPR and implementation pack**	Data location, processors, DPA, accessibility, integrations, timeline, support. Facts from Mikko	6–7
Demo	Demo script + objection sheet	15-minute flow; answers to "we already have chat", "our IT is busy", "we're tendering"	5
Proof	Case PDFs (3, then 7)	From section 3	2–6

Sales deck outline (12 slides)

#	SLIDE	#	SLIDE
1	Title: the problem in one line, with the customer's logo	7	Results across customers (one table)
2	What we hear from service leaders (3 quotes)	8	The AI-agent test
3	Why customers call even when self-service exists	9	One case matching the prospect's segment
4	What reChanneld does (one screen)	10	Implementation: days, not months
5	How routing works: topics → channels	11	Security and data
6	What you see: real-time contact insight	12	Proposed next step: a pilot on one page, 4 weeks

ROI calculator (inputs → output)

INPUT (CUSTOMER FILLS IN)	EXAMPLE	OUTPUT
Contacts per month by phone, email and chat	20,000	Contacts moved to self-service or the AI agent per month, × saving per contact = monthly saving. Plus payback period vs. reChanneld price
Cost per human-handled contact	€6	
Share of contacts that could be self-served	30%	
Expected shift with reChanneld (from cases: conservative)	15%	
Example result		**3,000 contacts × ≈ €5.50 saved ≈ €16,500 a month**

All example inputs are illustrative. Mikko confirms the method and the reChanneld price before the calculator is used with customers.

7. What I need to produce this

INPUT	FROM	NEEDED BY	FOR
Decision on brand architecture (Front AI vs reChanneld). Recommendation: one domain, product name leading, "by Front AI" as endorser	M	Week 1	Website, deck, all templates
Status, design files and CMS of the website rebrand	M	Week 1	Interim fixes vs rebrand copy
Approval and a 20-minute interview with 3 case customers	T asks, K interviews	Weeks 1–3	Case studies
Name and permission for the AI-agent case	T	Week 2	Lead message and post 1
Product access or current screenshots	M	Week 2	Deck, video, concept packs
Pricing model and typical deal size	M	Week 4	ROI calculator, deck slide 12
Security facts: hosting, data location, processors, DPA, accessibility, integrations	M	Week 5	Procurement pack, website
Founder story: why reChanneld exists (30-minute talk)	M	Week 3	Post (wk 4), About page

8. How content performance is measured

CONTENT	METRIC THAT MATTERS	IGNORE
Case studies	Clicks from outbound emails; meetings where the case was sent	Page views alone
LinkedIn	Profile views and connection accepts from ICP titles; replies; meetings that mention a post	Likes from peers and colleagues
Website	Demo requests per 100 visits; visits from target accounts	Total traffic
Sales materials	Stage conversion (first meeting → opportunity → pilot)	Downloads
Video and webinar	Sign-ups from target accounts; meetings within 14 days	Views
