

The Express, exactly as it is. Plus one front door for Premium readers.

No redesign. These are express.co.uk pages as they are today, with the standard reChanneld widget added and configured with the Express's own topics: Express Premium, print subscriptions and commenting.

SCENE 1 · HOMEPAGE

“Go Premium”, Login and Register. But nothing called Help.

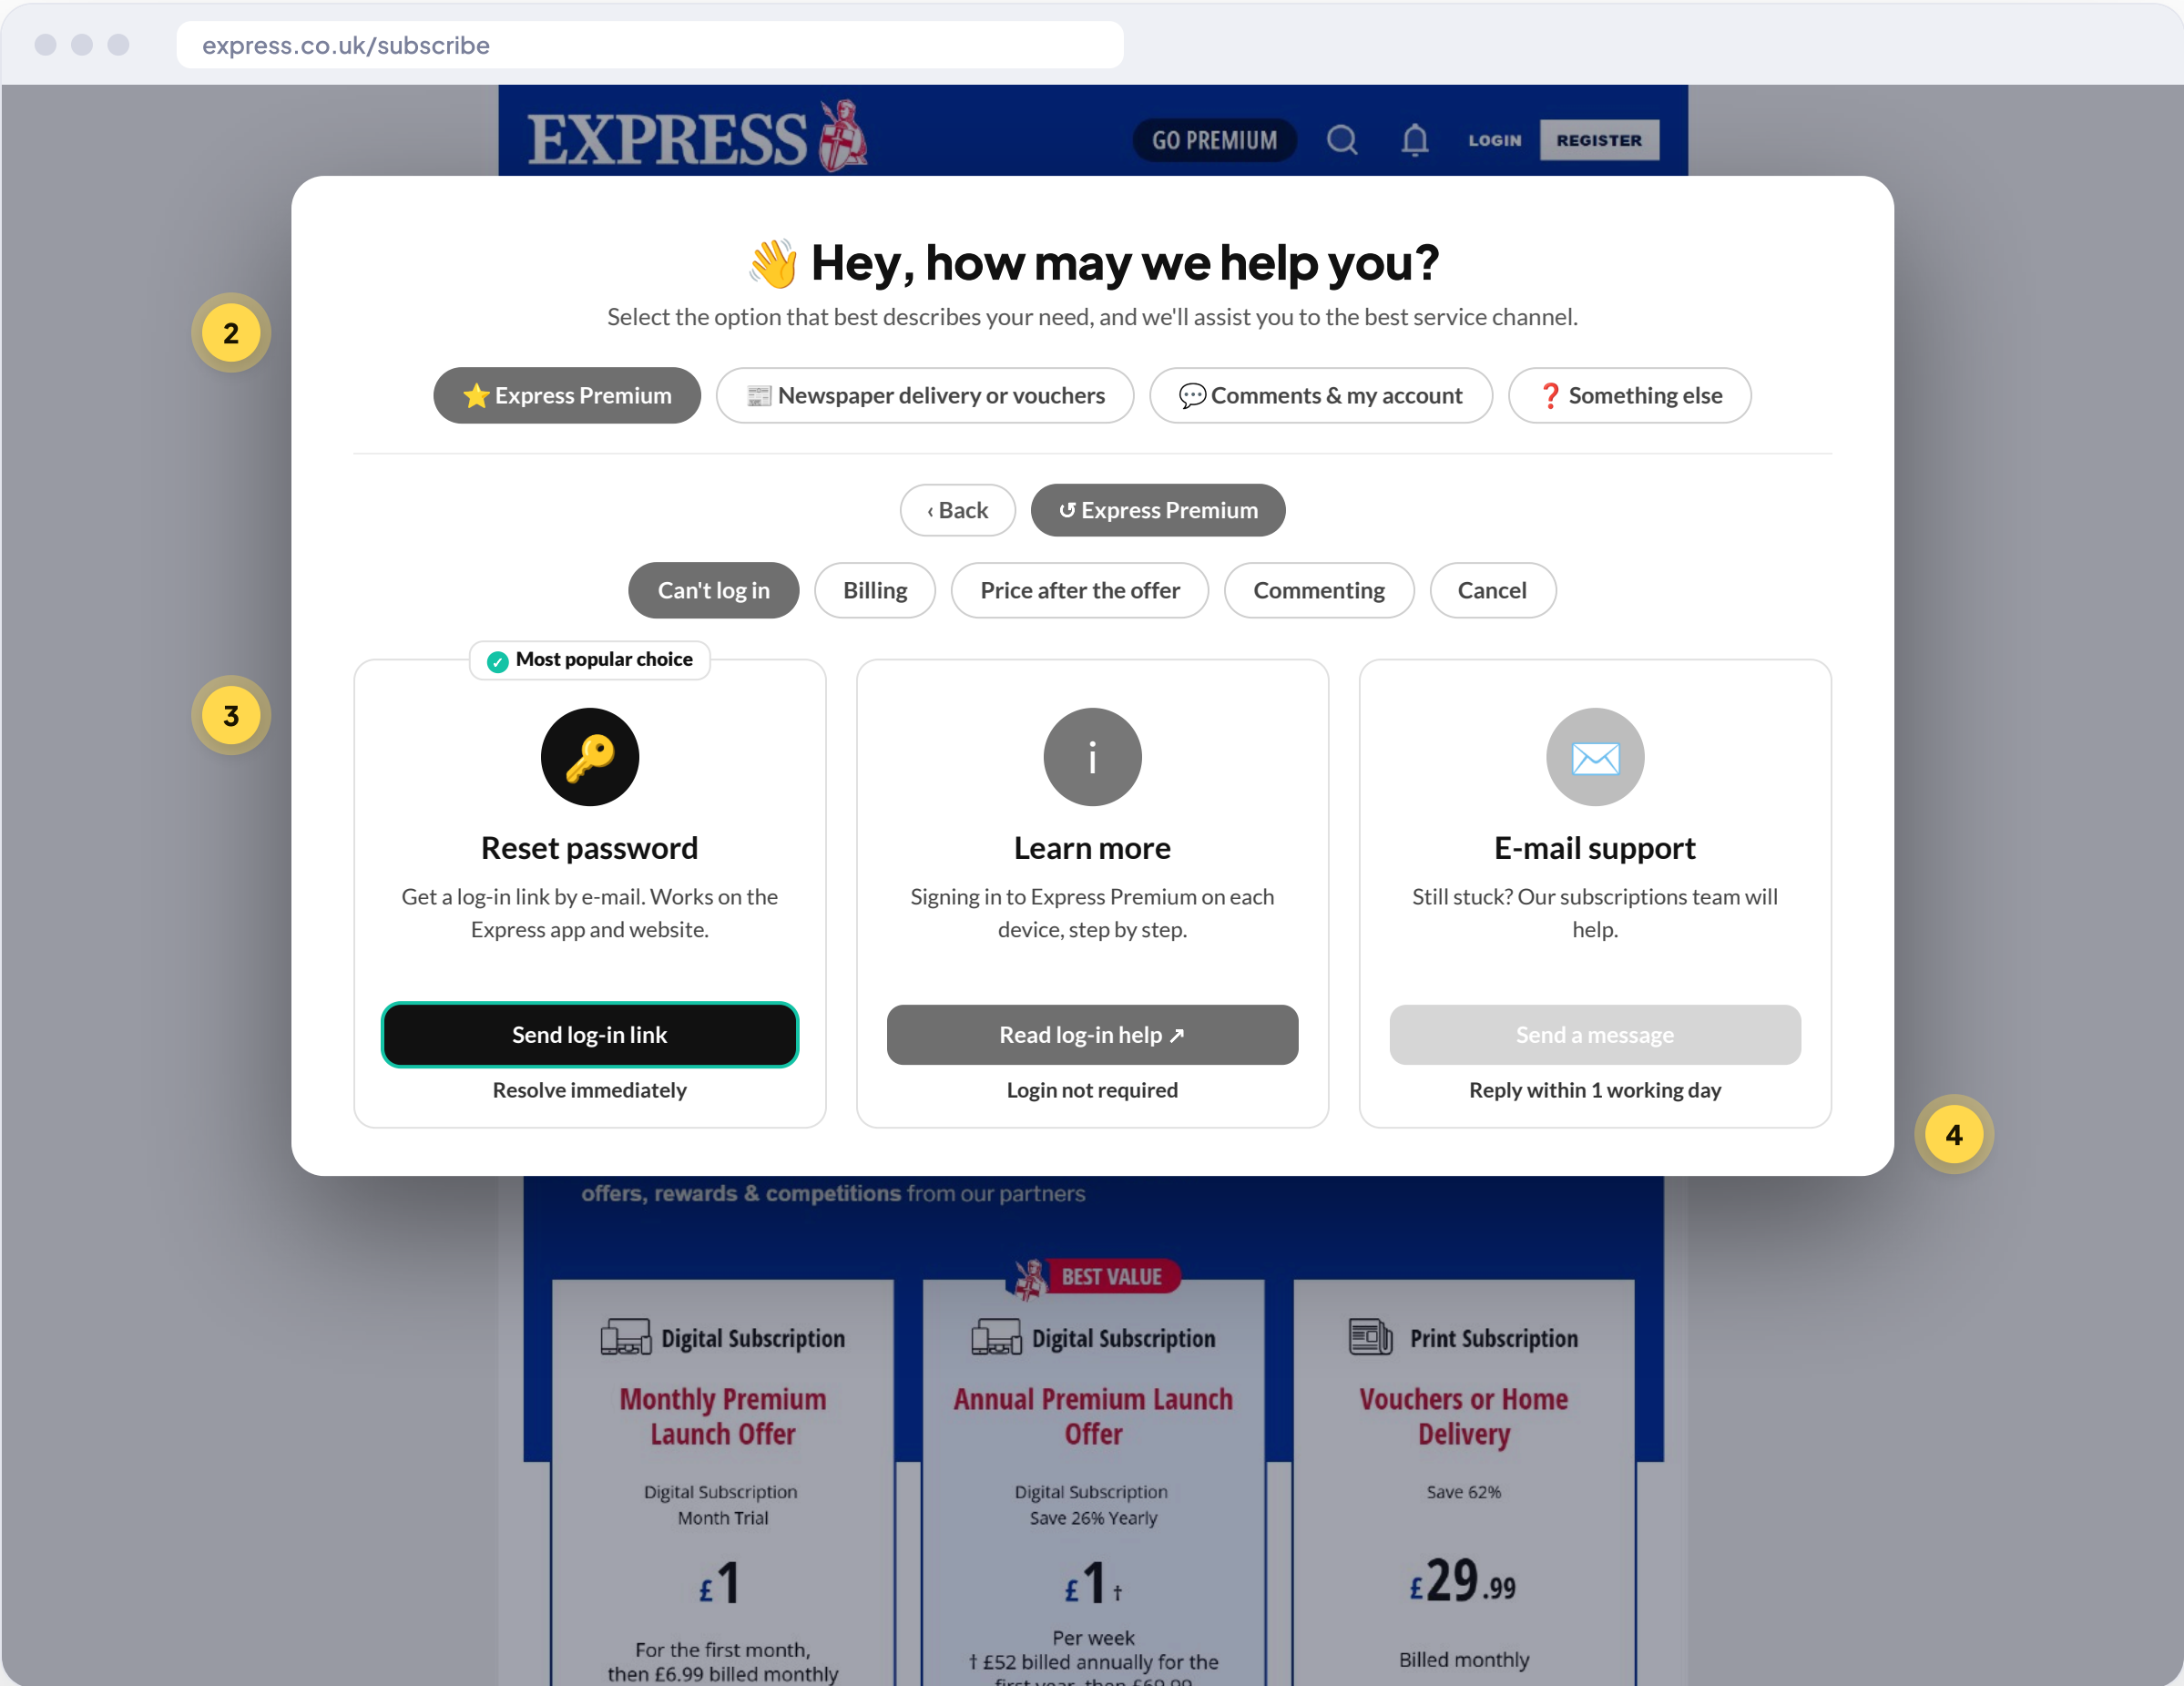

The Express header invites readers to subscribe, log in and register. Once they have, there's no visible way to get help. reChanneld adds one small button for subscribers. Nothing else moves.

SCENE 2 · EXPRESS PREMIUM PAGE

From “Already a Premium member? Login” to real help.

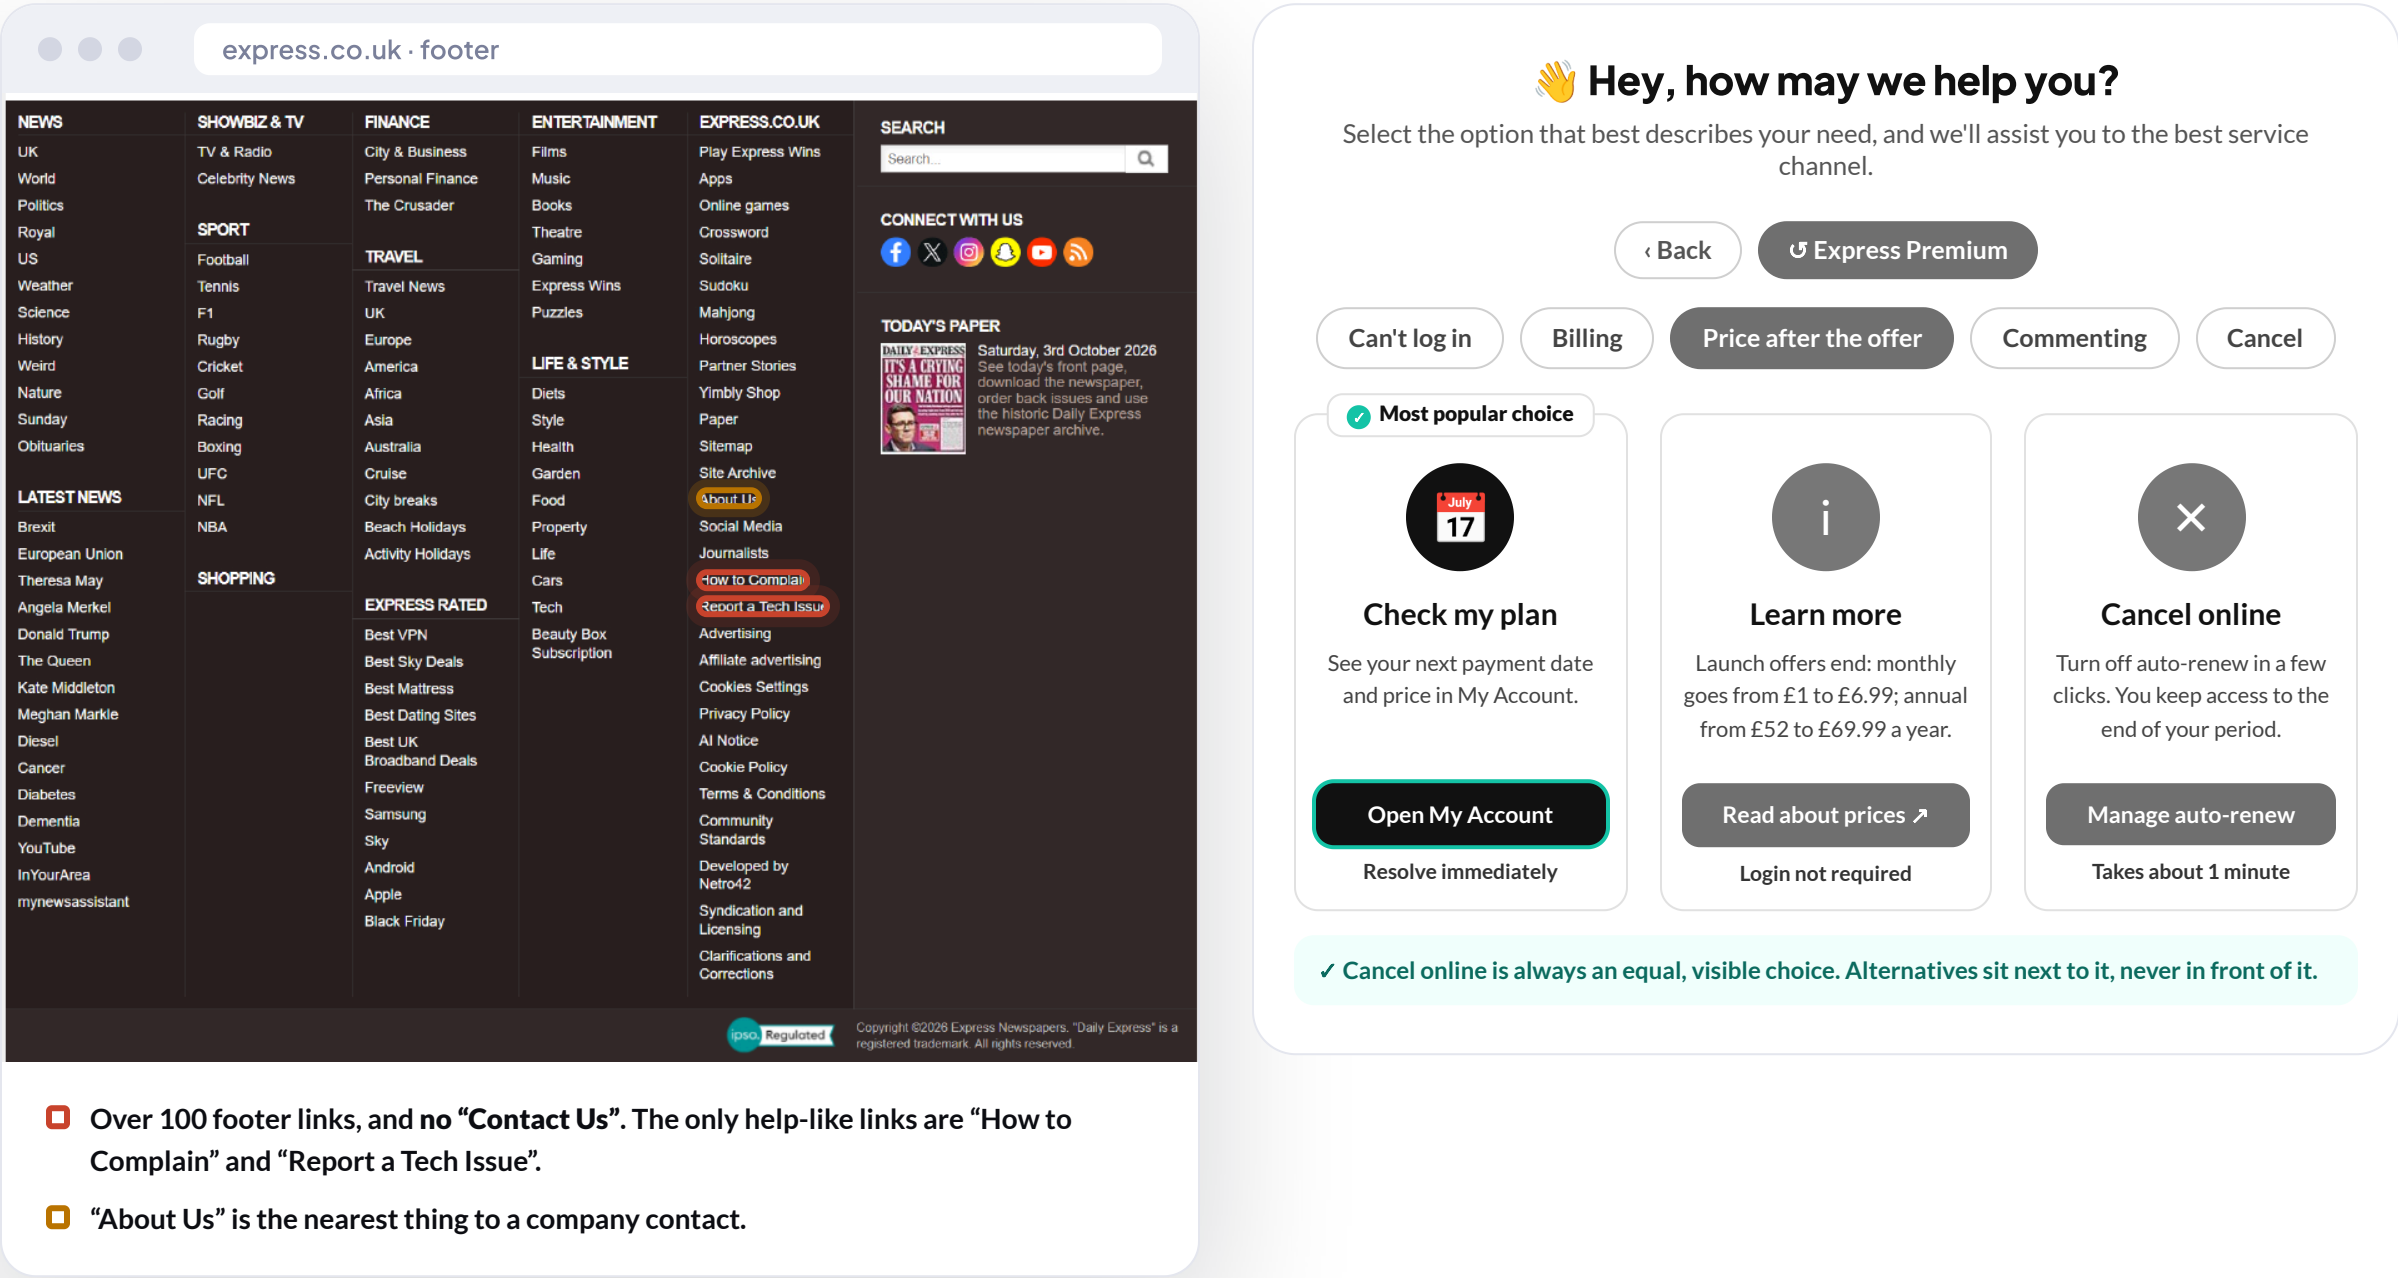

Today existing members get a login button, and the FAQ starts “Not a Digital Subscriber yet?”. With reChanneld, members pick their product and need, and get the fastest fix first.

SCENE 3 · FOOTER & PRICE STEPS

More than 100 footer links. No “Contact Us”.

Express Premium launch offers start at £1, then step up to £6.99 a month, or from £52 to £69.99 a year. A “Price after the offer” topic explains it before the first renewals in early 2027, just as the new UK subscription rules start.

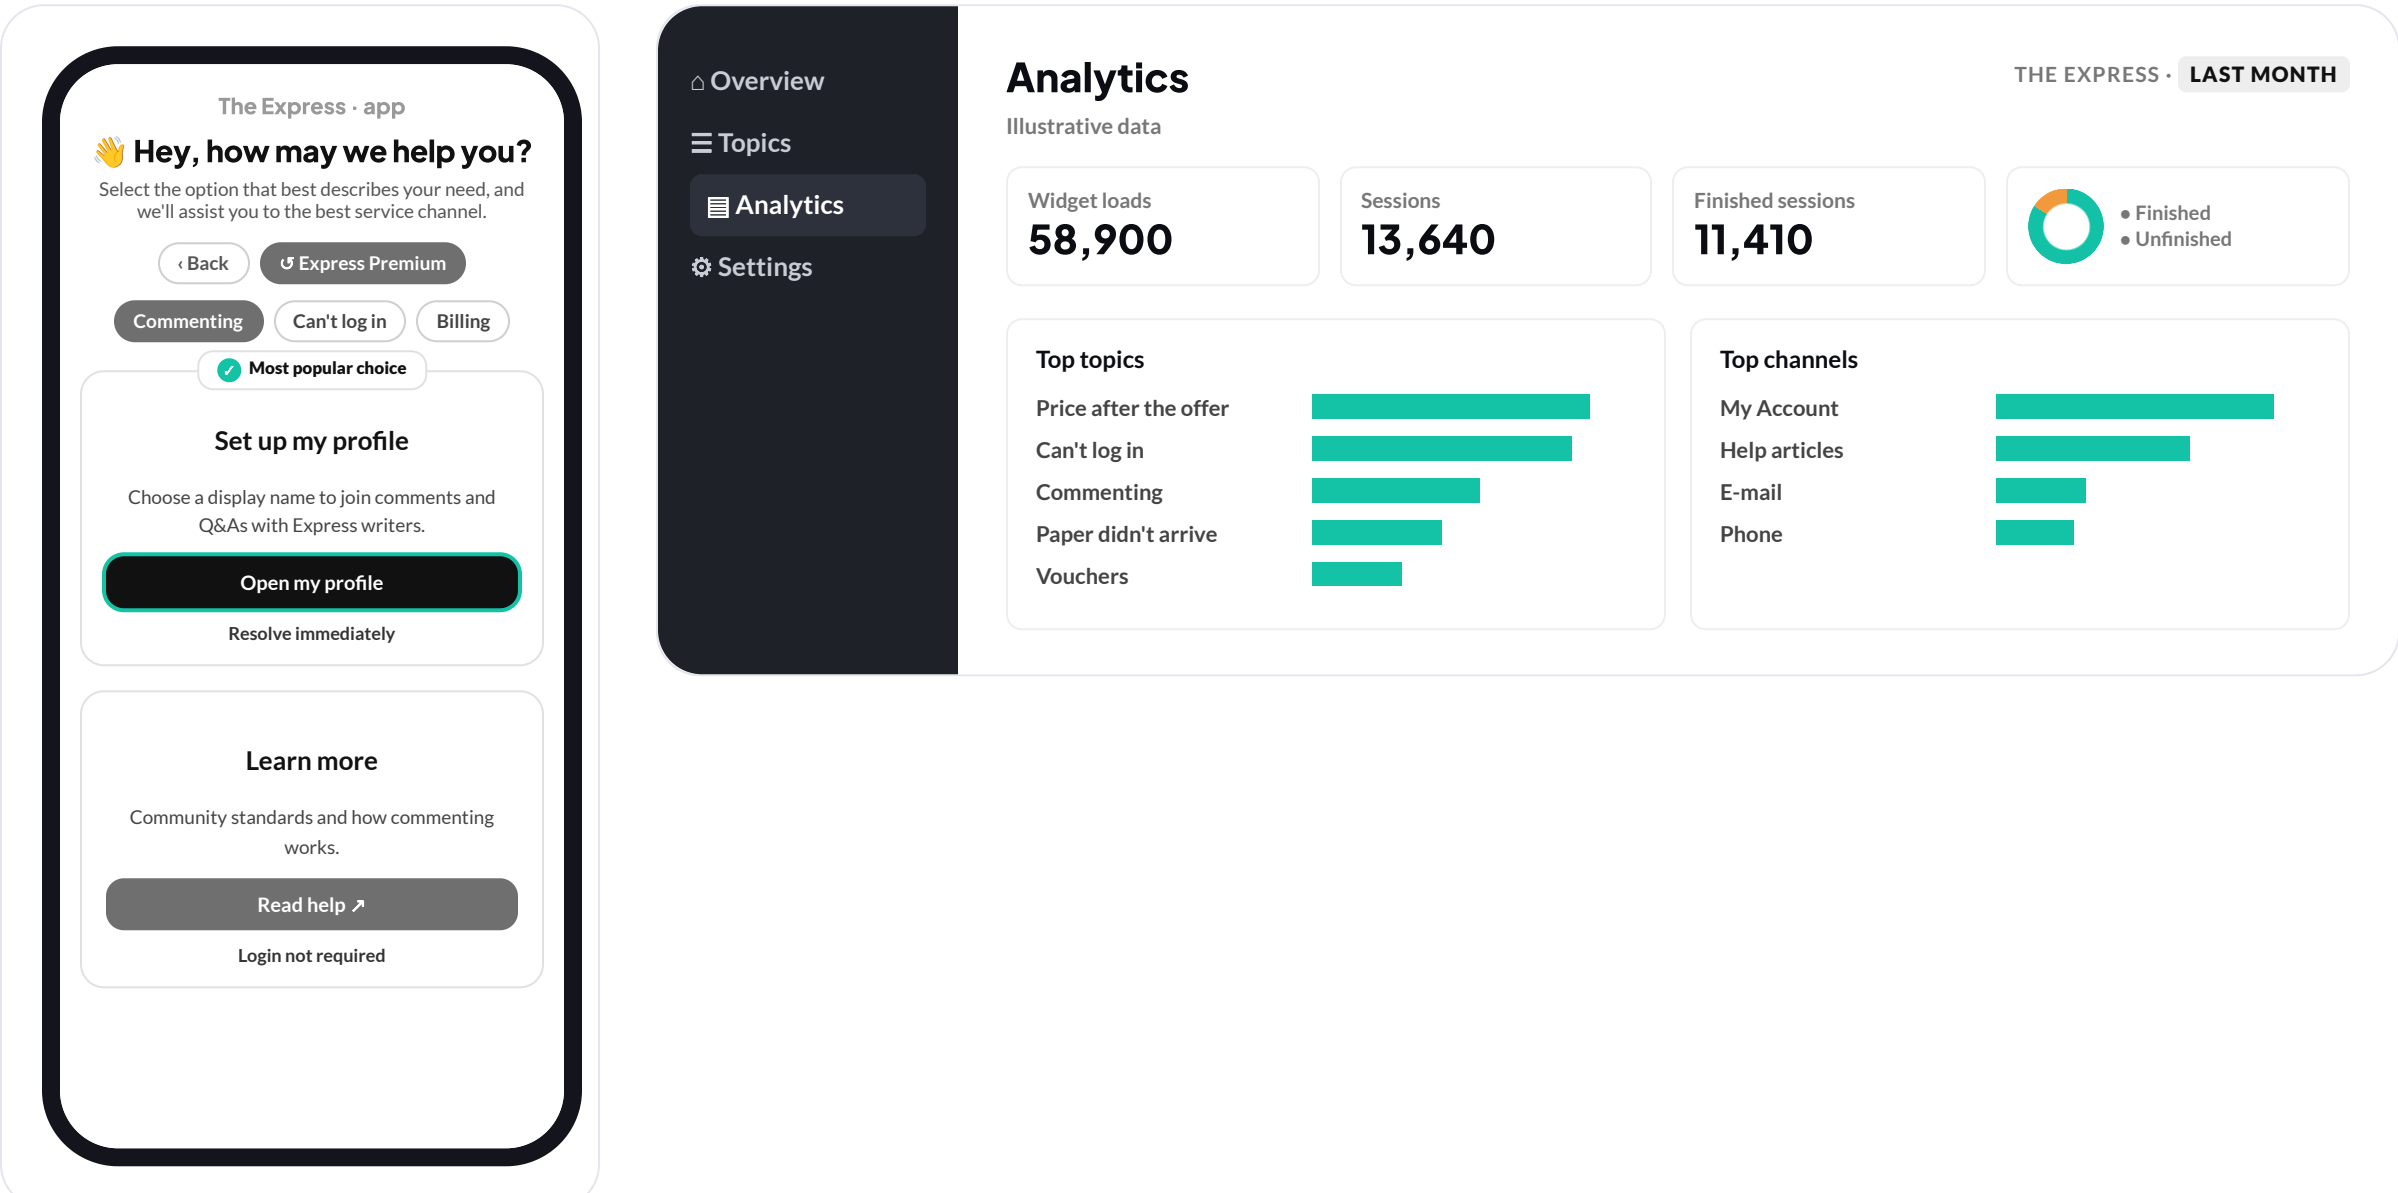

- Over 100 footer links, and no “Contact Us”. The only help-like links are “How to Complain” and “Report a Tech Issue”.
- “About Us” is the nearest thing to a company contact.

SCENE 4 · MOBILE AND ANALYTICS

Same help in the app. Live insight for the Customer team.

On the Express app the widget opens as a stacked view. In the admin panel the Customer team sees widget loads, sessions, top topics and channels for the Express in real time.
